SAP End User Projects Go Global

Olas^{IT} have taken the lead in providing new, innovative training solutions to Irish and Global SAP customers, that is enabling our clients gain the competitive edge they expected from SAP by empowering their people to get the best out of SAP.

What our clients say.....

"**Allergan Pharmaceuticals** had an urgent requirement to provide SAP training to one department in our organisation. Olas^{IT} brought their expertise in designing quality training solutions to our organisation which provided our users with the confidence and competence to use SAP proficiently and more importantly the ability to explore and utilise the information stored on SAP. As a consequence what started out as one course has turned into a complete standardisation of SAP training materials and up-skilling of our employees in all departments, in multiple languages across the Allergan organisation in Europe. Our decision to engage Olas^{IT} has helped us improve our business performance and customer satisfaction." - **Sarah Graham, QA Manager Eurocentre, Allergan Pharmaceuticals**

Other companies where we have successfully designed and delivered SAP end user training solutions across global sites include:

International
Criminal
Courts (ICC)

Firmenich
